CIA Analyst Still in Critical Condition

A Central Intelligence Agency analyst who was rescued from the gas-filled kitchen of his Northwest apartment yesterday is still in critical condition at Gallinger Hospital today.

Doctors said he apparently had

taken "a good dose" of barbiturates. Police said they found the windows taped and gas jets turned on. Several notes, none of them explaining the situation, were found also, they said.

CIA Man's Condition Listed as Critical

A Central Intelligence Agency analyst remained in critical condition at Gallinger Hospital today after an apparent suicide attempt early yesterday.

Frederick E. Crockett, 45, was found in his gas-filled apartment, 2500 Wisconsin avenue N.W., where signs had been posted warning of the presence of gas. Jets on a kitchen stove had been opened and a rug had been stuffed under the door.
